

# LET'S TALK

## Eye and tissue donation

Each year, thousands of Australian lives are changed through the gift of transplantation of donated tissues, including eye tissue.

In 2022, more than 2,300 people had their eyesight restored through a corneal transplant.

Plus, over 7,400 people received tissue transplants – all thanks to the life-changing gift of donation.

**One eye and tissue donor can change many lives.**

Madison received a tissue transplant thanks to a donor.
