

A note can be added to a person record in OrganMatch in the **Notes & attachments** section. Notes allow users to attach relevant information for the person or to include information on a report. When a note is added through the Transplantation or Donation Portals, the system generates a notification to the Laboratory Portal. A notification is also generated to the Transplantation Portal if a note is added through the Laboratory Portal and the **Internal Note** is selected as No. Users can reply to these notes from the Transplantation or Donation Portals.

The **Notes & attachments** section has a current and history tab where active notes appear in the current tab and archived notes appear in the history tab. Users can filter notes by the **Sub-category** or can sort the notes by clicking on headings in the list table. The **Category Person-ANZKX** applies to notes that can only be viewed by the ANZKX team and laboratory portal users with the KPD National Lab Coordinator and Senior User roles.

Notes can also be viewed in specific sections depending on their categorisation. For example, when attaching an ABO report to a note, the **Sub-category** ABO forms is selected. This note can then be viewed in Samples & tests results by clicking View Notes in the Blood group tab.
